

BULLDOG
PRINT+DESIGN

We're Moving!

While the sales and design office has already moved its home to 255 South Street, **Bulldog Print + Design's printing operations** at Spring Street and River Road will be moving in late January/early February. Our new home will be next to Sam's Club at:

4435 Atlanta Highway
Athens, GA 30606
706-542-4440

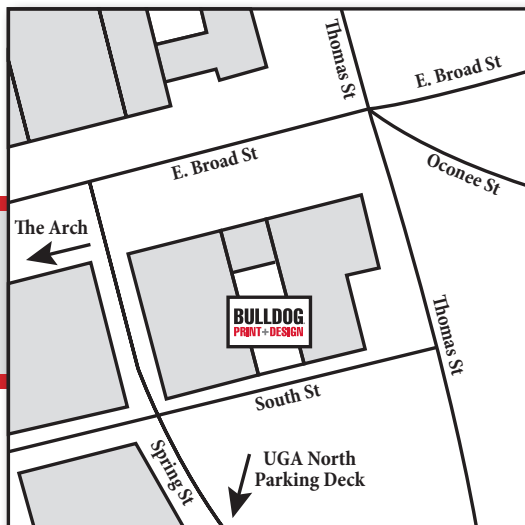

This new location gives us the room we need to grow and improve our service to the UGA community. Please bear with us during the transition. We will make every effort to ensure that all print deadlines are honored and we maintain our standard delivery and turnaround times. We appreciate your continued business.

Our sales and design office is now located downtown, just a couple blocks from the Arch & North Parking Deck.

255 South Street
Athens, GA 30602
706-542-3861

We now offer high quality digital photographic & videography services.

Tips for Design & File Submission

In order to make the printing of your project run as smoothly and error-free as possible, please follow these design & file submission suggestions:

Document setup – Always set your document page size to the actual size of the piece you are designing for output.

Bleed – Bleed is the area of color or image that extends beyond the page and should be set to 1/8" (0.125").

Image format – Use TIFFs or hi-resolution JPEGs for photos and AI, PDF or EPS format for graphics (like logos). Low-resolution JPEGs, GIFs and PNGs are web formats and should not be used in printing. Graphic elements should be sent at 100% of reproduction size.

Image Resolution – 300 dpi is recommended whenever possible to ensure quality reproduction. Lower resolution risks pixellated images.

Order your printing:
