

Administrative costs for the 2019 State Charitable Contributions Program were 14% of contributions from all state agencies, which is what the estimate for the 2020 campaign will also be. The administrative fee includes staff time charged to the program, supplier costs (America's Charities, Awards. Etc.), etc. The actual donations raised and deducted from paychecks that are sent to the charities are reduced by the program administrative fees. The administrative fee is deducted by the State and not the University of Georgia or the University System of Georgia.
